## Frontend Developer

### SUMMARY

Frontend Developer with hands-on WordPress experience at Vantec Media, building and customizing client websites, themes, and WooCommerce stores. Alongside client work, developed 4 independent React projects, including a Hospital Dashboard, AI Resume Maker, Amira Store, and StreamPulse, applying React 19, Zustand, REST APIs, and component-based architecture. Experienced in creating responsive web interfaces across React and WordPress with a focus on maintainable, reusable UI.

### SKILLS

- Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frameworks & Libraries:** React 19, Tailwind CSS, Bootstrap, Framer Motion, GSAP
- State Management:** Zustand, Context API
- API & Data:** REST API Integration, Asynchronous JavaScript, JSON
- WordPress & E-Commerce:** Developed custom WordPress themes and WooCommerce storefronts, implementing custom templates, page layouts, and e-commerce functionality based on client requirements.
- Tools:** Git, GitHub, Vite, VS Code, Chrome DevTools, React DevTools
- Development:** Component-Based Architecture, Reusable Components, Responsive & Mobile-First Design, Cross-Browser Compatibility

### WORK EXPERIENCE

#### Frontend Developer Intern | Vantec Media — Lahore, Pakistan (2026 – Present)

- Completed a **6-month NAVTTAC-certified** training in component-based frontend development, then applied it across live client projects at Vantec Media
- Delivered a custom **WordPress** website for a packaging & printing business (**PinnacleCraft**), integrating a quote-cart system, automated client email workflows, and a responsive showcase of 15+ real client brand logos
- Engineered **RozeeAtelier**, a dual-model WooCommerce storefront spanning 6 fabric categories and dual PKR/CAD pricing, populating the live catalog with 30+ products across 5 structured upload batches
- Restructured a monolithic React codebase into component-based architecture using Tailwind CSS, Framer Motion, and Zustand, improving reusability across 2 client storefronts
- Develop state-driven interfaces with React 19, Zustand, and Context API, integrating REST APIs for real-time data fetching across both client projects
- Standardized responsive layouts across desktop, tablet, and mobile for 2 React and WordPress client projects, ensuring consistent UI and cross-browser compatibility
- Debugged and resolved 4 categories of production issues — caching conflicts, deprecated WordPress functions, broken rewrite rules, and UI bugs — restoring stable client-facing functionality

### PROJECTS

#### MediCore — Hospital Management Dashboard | React 18, TypeScript, Zustand, Recharts | [Live](#) · [GitHub](#)

Full hospital ops suite covering 8 workflows — patient/doctor/bed management, appointment scheduling, pharmacy & lab tracking, billing — with A4 PDF invoice/report exports via jsPDF and persistent Zustand state, gated by CI (typecheck + build) on every PR.

#### Vynora — Event Discovery & Ticketing Platform | React 18, TypeScript, TanStack Query, Zustand | [GitHub](#)

Frontend-only ticketing platform combining 5 filter types (category, city, date, price, featured) with a simulated end-to-end checkout; built with a real focus-trap on every overlay and validated by 49 passing unit/integration tests with zero ESLint/accessibility errors.

#### Amira Store — Fashion E-Commerce Storefront | React, Vite, Tailwind, Framer Motion | [GitHub](#)

Editorial-style luxury fashion storefront design around a custom 4-color (blush/rose/ivory/champagne) design system, with parallax hero, wishlist + cart interactions, and motion-reduced accessibility support throughout.

#### Resume Studio — AI-Assisted Resume Builder | React, TypeScript, Zustand, jsPDF | [GitHub](#)

Local-first resume builder offering 5 switchable templates with a live A4 preview, drag-and-drop section reordering, and one-click PDF export — fully autosaved to localStorage with no backend.

### EDUCATION

- BS Information Technology (BSIT)** | University of the Punjab (Affiliated) (Expected 2028)
- Intermediate** (Pass: 2024) | **Matriculation** (Pass: 2022)

### KEY ATTRIBUTES

- Client-Focused Development
- Component-Based Architecture
- Responsive & Mobile-First Development
- Cross-Browser Bug Resolution
- Custom WordPress Theme Development
- Continuous Technical Learning
